

## LARGE INFORMATION ABOUT TRADE COPIER SERVICE

We have been operating as a Forex Signal provider since 2012. During these years, tens of thousands of customers have benefited from our service. Despite the fact that we always make a profit, most of the customers, unfortunately, could not continue to lose money over time due to their lack of discipline and risk.

Most people, I would even say that 99% of people in the forex trade are completely wrong. There is no special gold strategy in trading, it is possible to earn even with the simplest strategy. You just have to be a person with maximum discipline and perfect will. Thus, since 99% of our customers do not have these indicators, we decided to take all the precision on ourselves, to open all the given signals at once, with 99.8% accuracy in the customer's accounts.

## WHAT ARE THE ADVANTAGES OF JOINING A TRADE COPIER?

- The market is moving very dynamically. In every Scalping trade, the importance of accuracy and minutes is enormous. With the help of Trade Copier software, all transactions in our MAM account are opened and closed in the customer's account. The customer can track his account for days and weeks only by selecting the recommended lot size according to the size of his balance.
- Statistics show that traders with low experience, poor mathematical calculations (unfortunately, they cover 98% of people) are often in a desperate situation because they can not calculate their losses in advance. At the same time, they overload their balance by acting emotionally which in other cases leads to complete money loss. Our Trade Copier Service will fully insure you against these situations, as long as you do not open a transaction on your own account.
- We use the highly sensitive Trade Copier software and the latest generation servers (VPS) 24/7 without any technical problems. This way, customers do not need to rent any VPS. Although the first rule of business is to "protect the main capital", many traders do not follow it. By using our Trade Copier Service, you will protect your capital and earn a stable monthly income.

Our trade strategy, which we have been working on for many years and is constantly improving, has been adapted to every movement of the market. Neither a sharp trend, nor a long-term correction, nor a normal trend can completely shake our trading strategy. If you look at our trade statistics for the last 5 years, you can see that we have made a profit every month.

A standard lot is selected for each transaction, taking into account the variety of customer balances connected to the Trade Copier service. Instead of increasing the number of lots in the course of this trade, we increase the number of orders. The higher the number of transactions is the more reliable. In each case, the amount of risk in all orders is taken into account with particular precision. Because trade processes are scalping, the loss and profit margins are small. The SL and TP values of each operation are determined in absolute terms. Given the variety of brokers, SL and TP prices are not reflected in customer accounts.

As soon as the orders on the MAM account closes in TP or SL, the orders are immediately closed in the customer accounts via the trade copier program. Our strategy works accurately on all market tools. However, we can choose different instruments to trade with high accuracy. Our main goal is to earn money. It is not about which financial tool is important for the customer, but how much we will earn at the end of the month. Based on our 16 years of trading experience, we can say that we are a professional team that provides the highest quality service in this market.

## RESULTS OF SERVICE

We present a 5-year trading statement accepted by professional traders on myfxbook.com, which is engaged in the analysis of trading accounts.

<https://www.myfxbook.com/members/Latif/forexcues/2420289> This account is a demo account, but the same orders are copied with 100% accuracy in the Real account we have shown below.

<https://www.myfxbook.com/members/Latif/forexcues-account-management/9146167>

It should be noted that, unlike the fake "signal sellers", who are deceived by the use of your services, we show you our trade with 100% transparency. To understand our difference, ask these fraudsters to show you an account with at least 1 year of trading statistics. We are sure that they will not be able to show you any 3-month statements.

In addition, you can get acquainted with our daily, weekly, monthly, results on our <https://forexcues.com/> or telegram channel (<https://t.me/forexcues>).

We regularly share the investor password of our MT4 Real account 1-2 times a month.

## MINIMUM DEPOSIT AND ADVISABLE BALANCE

The minimum balance limit is \$500. The recommended minimum balance is \$1,000. Diapers may consider this a game, but we see forex trading as a completely serious business. From this point of view, our advice to naive people who think that they can earn serious money in forex with a small investment of 100-200-300 dollars is to check themselves in other areas.

Based on our 16 years of trading experience, we are 100% sure that Forex is not a business that can achieve serious results with a deposit of \$100-200 or even \$1,000. If you want to do serious work, it is inevitable to take big risks. Meanwhile, to be poor, to be greedy - this is not true for forex. Forex is a money-making business. If you do not have the money to earn money, you should first think about the options that you can get your initial capital from other areas.

## HOW MUCH CAN I LOST (ABOUT RISKS)

Every successful business has its ups and downs. People are only interested in the success of successful people. They use these success stories as an example for motivation. But no one cares how many billions Warren Buffett lost while winning 102.2 billion dollars.

By the same, we earned \$9668.17 in one of our real accounts.  
But to earn that money, we lost \$10,091.61.

This situation can happen in all businesses. The same with our Trade Copier Service. Always keep in mind a risk that you may lose a maximum of \$500 for every 0.01 lot.  
If you have a balance of \$1,000, you can lost \$500 in a day. If you have \$500, it can lost it ANY TIME. We assume a risk of \$500 for a maximum of 0.01 lot.  
Simply, a \$0.01 lot is the optimal lot for a deposit amount of \$1,000 to stay in the market. (This is a recommendation).

For more risk-free trading, you can use large balances and minimal lots.

For example, you want to earn money with a maximum risk of 50%. in which case your balance should not be less than \$1,000.

Assume that you are a serious investor and agree to lose 5% of your maximum capital. In this case, your Deposit amount must be 10,000 and the lot size you selected must be 0.01.

Let's say, there is a risk of losing \$500 for every 0.01 lot traded. If the topic is obscure to you, contact a math teacher at a nearby school. This is a simple mathematical calculation.

## HOW MUCH CAN I EARN (ABOUT PROFITS)

We will answer this question according to the 2021 statistics. If you had a balance of \$1,000 and the orders opened with 0.01 lots, the result of 2021 would be as followings:

- ✓ January \$327
- ✓ February \$712
- ✓ March \$639
- ✓ April \$197
- ✓ May \$368
- ✓ June \$23
- ✓ July \$613
- ✓ August \$234
- ✓ September \$45
- ✓ October \$635
- ✓ November \$242
- ✓ December \$231

You can calculate these results by multiplying 2x for lot 0.02 and 5x for lot 0.05.

These results were created according to last year's statistics. Different results can be recorded for next months. As you can see, we earned \$ 712 with 0.01 (mini lot) and the month we earned \$ 23 also. In fact, it has not been finished with damages for a month. But this does not insure our future. Just as there is risk in every business, there is risk in our business. As you earn, remember to pray to the god you believe in.

## SELECTING BROKER FIRMS

There are a few brokers that we have appointed to join the Trade Copier Service. When choosing these brokers, we have taken into account all the countries of the world in terms of more reliable trading conditions and the possibility of opening an account.

1. The most suitable platform is OctaFX for Asia, Europe, South America, Australia, Oceania regions. To open an account: <https://my.octafx.com/open-account/?refid=ib26235> (MT4, 1:500 leverage). You can even get a 100% bonus from this broker. Depending on the size of the lot we open over time, this bonus may be yours completely during a few months.
2. Tickmill.com - this broker is one of the brokers that we recommend. If you can open an account with a 1:500 leverage in the country where you are a citizen, you can open an account here as well.

## INFORMATION ABOUT RISKS AND TERMS

Just as there are risks and force majeure risks in every field, there are risks in our field.

Our 16 years of trading experience have greatly helped to minimize these risks maximally. The total risk in trading is calculated at a maximum of \$500 for every 0.01 lot. (\$5,000 for a trade of 0.1 lots). If we are faced with such a loss, we will take it upon ourselves to stop all operations and consult with you again.

Note: With the exception of rare price fluctuations - for example, when a very strong movement occurs, the price can suddenly jump in the range of 500-1000 points.

At this time, almost all brokers have spread enlargements and server freezings. Approximately, market reaction to news such as Brexit. Although such cases occur every 3-4 years, it is the duty of every professional trader to consider them as a risk factor.

### **Force majeure risks.**

No company in the world is insured against bankruptcy during an emergency crisis. We can't guarantee that any broker you open an account with will not go bankrupt one day.

Therefore, we present these brokers which have thousands of positive customer reviews.

Our cooperation with these brokers is only as an IB partnership. We do not act as part of any broker.
